# Project Demo Planning

| | |
|---|---|
| **Date** | 30 June 2026 |
| **Team ID** | |
| **Project Name** | OptiCrop : Smart Agricultural Production Optimization Engine |
| **Maximum Marks** | 1 Mark |

### Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

| S.No | Demo Section | Description | Duration (mins) | Responsible Member |
|---|---|---|---|---|
| 1 | Introduction | Introduce the project, objectives, and the agricultural problem addressed by OptiCrop. | 1-2 mins | Bille Mrudula |
| 2 | Solution Overview | Explain the technology stack, dataset, machine learning models evaluated, and system architecture. | 2 mins | Bille Mrudula |
| 3 | Live Application Demonstration | Demonstrate user input, crop prediction, confidence score, and crop information using the Flask web application. | 2 mins | Bille Mrudula |
| 4 | Machine Learning Explanation | Briefly explain data preprocessing, model comparison, Random Forest selection, and achieved accuracy (99.32%). | 1-2 mins | Bille Mrudula |
| 5 | Testing & Validation | Show functional testing, input validation, and application reliability. | 2 mins | Bille Mrudula |
| 6 | Future Enhancements | Discuss planned improvements such as crop images, weather API integration, fertilizer recommendations, deployment, and conclude the demo. | 1 min | Bille Mrudula |

Total Duration - **8-9 mins**

### Demo Flow Summary:

| Step | Activity | Notes |
|---|---|---|
| 1 | Introduction & Problem Statement | Explain the need for AI-assisted crop recommendation and project objectives. |
| 2 | Solution Overview | Present the system architecture, dataset, |

| | | |
|---|---|---|
| | | technologies, and machine learning workflow. |
| 3 | Live Feature Demonstration | Enter sample agricultural parameters, generate crop recommendation, and explain the prediction results. |
| 4 | Q&A Session | Answer questions related to machine learning, Flask implementation, project design decisions, and future scope. |
